CEIPAL

WE TAKE YOUR
PRIVACY AND DATA SECURITY VERY SERIOUSLY

CEIPAL is continuing to make significant advances in protecting customer data by innovating and implementing gold-standards of software security

IP Restriction

Restrict account usage to only designated IP addresses that you select and avoid unauthorized access in your account. CEIPAL allows account administrators to restrict access to accounts and data to an authorized list of IP addresses. Anyone accessing outside of those IP addresses won't be allowed.

One Time Password

CEIPAL One Time Password (OTP) enables the users to share a time-bound, disposable password to the support team so that they can assist with the application. Keep your password secure by providing a One Time Password to troubleshoot issues.

Controlled Backup

CEIPAL has stringent processes in place to handle data. We provide monthly backups to clients who can then perform additional data backups. Only users with Admin privileges can request data backups if they desire.

CEIPAL
has added the following security features to the platform

CEIPAL Customers Benefits from Google Cloud Migration
