# The only crm built for G Suite

Copper does the busy work for you, so you can spend time building and growing relationships

4.8 / 5
G Suite Marketplace Rating

4.5 / 5
Chrome Web Store Rating

SELL IN YOUR INBOX

Native G Suite Integration

Copper integrates seamlessly with Gmail, Calendar, Hangouts, Sheets, Docs, and Drive so you can do everything from adding leads to closing deals right from Gmail.

ZERO DATA ENTRY TECHNOLOGY

Goodbye data entry

Copper scrapes the internet and your email for contact and company information so all the information you need is automatically in the crm, ready for you to start selling.

ONE CENTRAL SYSTEM

Track every customer moment

Every email, activity and account file is captured automatically so all your customer moments are organized in one place. Work leads and deals with the full context.

VISUAL PIPELINES & ANALYTICS

Insights from lead to close

Advanced reporting, dashboards, leaderboards and customizable pipelines give you the real-time analytics and insights needed to make smarter decisions.

Seamless integration with every G Suite app

Google Calendar
Meetings with your contacts are automatically recorded and synced. Contacts can book you directly from your calendar.

Google Docs
Attach a Google Doc to any lead, account, or opportunity in Copper.

Google Slides
Customize your slide decks in a few clicks by populating your decks with data from Copper.

Google Sheets
Export data directly to Google Sheets to create advanced dashboards, reports, and charts.

Hangouts Chat
Get notified of important changes and updates from leads to opportunities in chat rooms.

Gmail Contacts
Copper scrapes your email and syncs contacts to recommend new leads.

Data Studio
Connect to Google's Data Studio to analyze and visualize data from multiple sources.

Data Enrichment
Copper automatically inputs contact details, social profiles, company information and more.

100+ integrations
Connect with your favorite apps to help you close deals faster.
