Electronic Invoicing

Electronic Invoicing (EI) software for Architecture, Engineering, and Construction firms.

AUTOMATE COMPLEX INVOICE REVIEW PROCESSES.

CASH FLOW
Streamline processes, shorten the billing cycle and increase cash flow. Gain insight to improve project performance.

TIME TO INVOICE (TTI)
A powerful performance dashboard enables users to invoice faster and more accurately and view a snapshot of all jobs without having to create separate reports.

PRODUCTIVITY
Project managers are notified in real-time when an invoice is ready for review, mark-up and approval.

JOB TRACKING
Project managers view snapshot of all their jobs without creating separate reports, including job-to-date billed fees, fixed-fees remaining and project variances.

FINAL INVOICE PACKAGING
Required documentation is automatically assembled with multiple PDF packages going to the same contact in a single email.
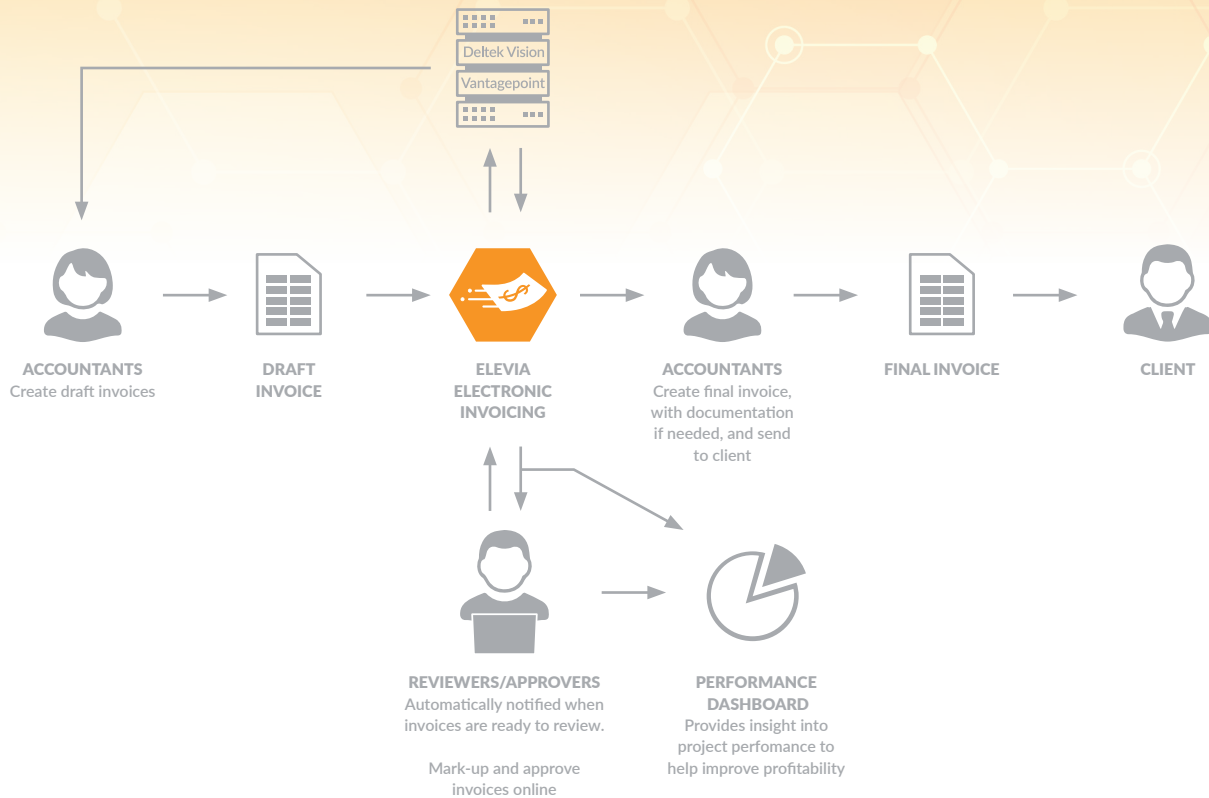

GO MOBILE
Mobile Docs for Electronic Invoicing, an add-on module for tablets and smart phones, enables anywhere anytime review and approval of consultant and/or client invoices.
