

Ingeniux Headless CMS Plus

THE AGILE PLATFORM FOR WEB EXPERIENCE

A New Approach to Headless Content Management

Ingeniux CMS provides a hybrid CMS architecture that blends traditional web experience capabilities with modern decoupled and headless content delivery approaches. Ingeniux Headless Plus delivers everything a headless CMS delivers, but it can also do much more.

Web Applications

Manage content such as Help, labels, CTAs and other content in your business applications from a central location and publish changes when required.

Highly Customized Websites

Enable developers to create customized rich web experiences and highly responsive websites and apps without sacrificing content management needs.

Native Mobile Apps

Manage content remotely without having to rebuild or recompile their applications. No need to resubmit to the App Store or force updates on mobile devices.

Third Party Content Editing

Enable external third parties to manage and update content following a strict workflow and approval process without needing direct access to the application.

WHY HYBRID IS BETTER THAN HEADLESS

ROBUST CONTENT MANAGEMENT

Complete content management features including authoring and editing, governance, workflow and in-context preview and editing.

FLEXIBLE CONTENT MODELING

The taxonomy manager provides an interface for creating categories and tags, associating them with content assets, adding synonyms, and setting security.

HEADLESS DELIVERY PLUS

Create new screens or pages and define routing with content linking and navigation.

CONTENT DELIVERY NETWORKS

Store rich media on media servers (such as YouTube or Vimeo) and CDNs (e.g. Amazon, Azure, Akamai); store files in NAS and SAN systems.

SAAS, CLOUD, OR ON PREMISE

24/7 support, and secure, high availability SaaS hosting; PaaS for Microsoft Azure and Amazon Web Services; or install Ingeniux right in your own network.

Build great content-enabled experiences for every channel and application

Manage your organization's content from a secure, centralized location and deliver it to any web application, native mobile app, website or channel when it's needed, the way it's needed.

Ingeniux Headless CMS Features

CREATE ALL YOUR CONTENT

CONTENT MODELING

Use the Schema Designer to define content types and associated elements, then use the Taxonomy Manager to apply tagging and classification to content.

AUTOMATE WORKFLOW

Take advantage of full-featured workflow design, reporting, and management to ensure all your content follows the appropriate reviews and approvals.

MULTI-LINGUAL SUPPORT

Request content by language or locale and structure it with flags that allow developers to switch the language for any content item.

MANAGE & MAINTAIN

CONTENT MANAGEMENT

Manage innovative websites and digital experiences, using a full set of content creation and management capabilities, visual Page Builder and intelligent in-context editing.

EDIT CONTENT IN-CONTEXT

Edit headless content in-context using the Remote Editing feature which uses a web service to render the presentation from a remote location.

DIGITAL ASSET MANAGEMENT

Treat digital assets like text-based content by mapping taxonomy and metadata, applying localization and retrieving them via the Content API.

MODERN AGILE ARCHITECTURE

NATIVE DOCUMENT STORE

Store content natively as JSON and XML or wrap binary objects like documents or media with intelligent metadata using a native .NET NOSQL database.

CONTENT API

Provide content natively as XML or JSON with an easy to use content API, available in REST and .NET, and return raw content by content item, audience or topic, or language or locale.

ROUTING/NAVIGATION

Manage the information architecture of headless sites and apps by generating navigation and routes through content linking and navigation.

Why Ingeniux

Keeping up with customer demands for information when and where they want it is creating challenges for marketing, customer service, support and lines of business. Ingeniux Headless CMS Plus provides a headless content management solution that empowers your organization to support the needs of your customers without the associated content management headaches.

Use Ingeniux to manage and deploy content across the entire organization, from Marketing to HR. Build Websites, Intranets, Customer Portals, Knowledge Bases and Technical Documentation hubs all with the same platform.

We empower the world's leading companies, associations, universities, government organizations, and non-profits to craft engaging digital content that resonates with customers and community members.

See what's possible.
