JAMIS® Prime ERP

Ensure key company data is easily accessible and accurate when you need it

A single sign on platform eliminates the need for separate applications and data integration infrastructure, making dashboards and reporting accurate and efficient. JAMIS Prime ERP helps you to achieve agility and fluidity in your business structure. The system centrally stores all key company information, allowing decision makers to view and share accurate data in real time.

Improve communication and transparency

Leveraging a cloud based system will allow you to connect with your mobile workforce, customers and other value chain businesses across all their devices- at any time.

Manage the entire government contract lifecycle with a single, integrated solution

Streamline all of your processes with one simple solution and run your business efficiently by offering integration across all key business components. From managing your customers to finance and budgeting, JAMIS Prime ERP has you covered.
