

Where ideas ignite

Lucidspark is a virtual whiteboard where teams can collect ideas, organize thoughts, and pick the best course of action to keep projects moving forward. From there, they can seamlessly take the next step and turn insights into reality.

Manage the creative chaos

Lucidspark gives you the space to imagine and the tools to focus. Use the Call Others to Me feature to get everyone to the same spot on your board. The built-in timer makes timeboxing activities simple. Collect votes on ideas to highlight trends and pinpoint the ideas with the most potential.

Welcome to freestyle brainstorming

Capture team insights with sticky notes and freehand drawing. Color-coded cursors, shapes, and lines for each collaborator keep everything organized. Work together on an infinite canvas that expands to hold even the biggest ideas.

Launch ideas into action

Don't let all your hard work go to waste. Take your scribbles and sticky notes and transform them into next steps by voting on ideas, grouping insights, and crafting workflows and project documentation.

Integrations to streamline your workflow

Lucidspark plays well with other apps you're already using. Boost productivity by connecting your innovation canvas to Slack, Google Drive, Lucidchart, and more!

Collaboration just got a major upgrade

Share ideas with your team in a visual workspace built for inspiration. Leave comments and swap feedback in the chat. You bring the vision, we'll bring the sticky notes, emojis, and a handy built-in timer.
