Mavenlink

MAVENLINK M-BRIDGE

Mavenlink M-Bridge makes it easy to integrate your systems and processes so you can do more with your data and workflows.
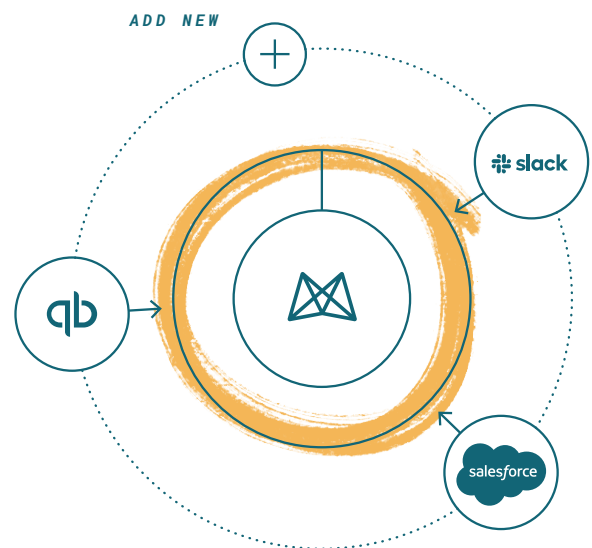

The Mavenlink Industry Cloud for Professional Services™ brings you powerful resource management capabilities, robust operational functionality, integration with your existing systems, all combined with the business intelligence you need.

ADD NEW

Connect. Scale. Succeed.

Connect with existing systems. Empower your teams. Extend the value of your technology investment. And infuse agility into your work with Mavenlink M-Bridge, a first in professional services.

Every business environment is unique and can benefit from integrated technology solutions. That's why we built the Mavenlink M-Bridge Platform.

Mavenlink's M-Bridge will enable your technology to work how your business works, leveraging your unique business processes. When your technology is optimized your people can focus on what they do best.

Grow Faster Through Self-Reliance

As technology designed to empower your business, M-Bridge connects your existing systems and allows users to build their own features to create greater operational efficiency. Quickly and easily tailor your automated processes and expand the opportunities where Mavenlink can enable your business without the need for engineering support. The result is an increase in productivity, consistency, and governance across your organization.
