Moki Device Management for BrightSign brings extensive remote management capabilities to BrightSign devices

Moki is proud to partner with BrightSign to offer robust, yet simple to use, remote player management software. With Moki, it's easy to keep a finger on the pulse on your digital signage network with our cloud-native remote management solution. Moki gives you granular control and visibility into your network so you can have peace of mind. Whether your deployment is 10 or 10,000, Moki makes it easy to scale, keeping deployment & maintenance costs down.

- **Quickly Provision Players**
  Moki enables you to get players up and running remotely in minutes, saving you time and deployment costs

- **CMS Friendly**
  Moki works in tandem with your preferred CMS adding an additional layer of control to your devices.

- **Remote Control**
  See real time content and take remote screenshots without end user interaction.

- **Multiple OS Support**
  Moki simplifies remote management for mixed-device environments. Manage your BrightSign, Android and iOS devices in one place with Moki.

- **Easy management of Large Fleets of Devices**
  Player grouping with hierarchy and group action sequences makes managing large fleets of devices a breeze.

- **Custom Alerting Capabilities**
  Peace of mind comes with knowing exactly what is going on with your fleet. With Moki you can rest assured you're always up to date.

- **Reduce Business Costs**
  Remote management saves businesses an average of 30% on operational and maintenance costs.

- **Support**
  Moki is obsessed with customer success. You can trust our knowledgeable and experienced support team will help you if there's ever a need.
