

Real-Time Benefits Check + Electronic Prior Authorization

Myndshft moves revenue cycle up to the time of service by automating eligibility and benefits verification, coordination of benefits, insurance discovery, patient financial responsibility, and prior authorizations.

Why Myndshft

Myndshft enables seamless, end-to-end care while meeting the revenue cycle challenges you need to manage.

Solutions & Benefits

BENEFITS VERIFICATION & ELIGIBILITY

Automated, real-time benefits and eligibility verification

Connects to >700 payers to capture member-specific health insurance data

Access to 93% of covered U.S. lives

COORDINATION OF BENEFITS

Automated identification of primary, secondary, and tertiary payers (if available)

Addition or correction of primary & secondary payer within client's system even if not provided initially

INSURANCE DISCOVERY

Identify active coverage for more than 30% of self-pay accounts

Recognize up to 12% increased revenue

Reduce operational costs with increased margins. Minimize write-offs and third-party agencies

PATIENT FINANCIAL RESPONSIBILITY

Automated real-time determination of patient financial responsibility

Most accurate solution in market for both pharmacy and medical benefits

PRIOR AUTHORIZATION

Instantly identifies whether prior authorization is required based on payer, plan, and groups

Digitize and automate prior authorization submission directly to payers

USE CASE

A blue-toned illustration of a business meeting. Four people are gathered around a table. One person is pointing at a whiteboard that displays two line graphs with upward-trending arrows. Another person is holding a laptop. A third person is looking at a document. A fourth person is sitting at the table with a cup. The scene is set in a modern office environment.

Case Study

How Myndview helped a national specialty pharmacy grow

Problem

Our client was struggling with flat revenue caused by process inefficiencies and accuracy problems that significantly slowed speed to therapy. As a result, they were leaking revenue and unable to grow market share.

Challenge

They doubled the team assigned to the manual tasks. They applied traditional process improvement strategies. They even evaluated whether to build their own solution. But none of those options solved their challenge.

Solution

With Myndshft, our client is able to directly connect to over 700 payers, representing 93% of the U.S. covered population. So they can seamlessly integrate real-time medical and pharmacy benefits data and automated prior authorization into their existing workflow and IT infrastructure.

How we do it

COMPREHENSIVE RULES LIBRARY

With a library of continuously-updated rules for thousands of payers, Myndshft automatically synchronizes with the eligibility and prior authorization rules for all specialty pharmacy and diagnostics procedures. So, you always have the most up-to-date requirements, without the effort.

SEAMLESS INTEGRATION

Myndshft integrates with thousands of LIMS, EMRs, HIS, and financial management solutions.

SELF-LEARNING

Myndshft dynamically updates automated workflow and rules engines based on the actual responses and results from submitted prior authorizations. Our technology continuously adapts to the rules in use by payers. The more you use it, the smarter it gets.

LIGHTNING FAST

Automatically verify eligibility and benefits, calculate patient financial responsibility and identify and electronically submit a prior authorization. All within less than a second.
