myndshft ™

Prior Authorization Auto-Adjudication and Decision Support Engine

A first of its kind end-to-end PA solution for payers and providers. Streamlines PA adjudication and decision processes, saving valuable time for both providers and payers.

Myndshft for Payers

Myndshft enables payers to automate PA adjudication and serves as a decision support engine to streamline complex utilization management processes. The solution integrates seamlessly with a provider's EHR and a payer's UM system by leveraging the FHIR standards or it can be accessed via any web browser.

Lead the market in automated Prior Authorization, enabling faster care for members and address administrative burden for providers.

Improved access to care for members enabling better health outcomes and cost savings through reduction in avoidable hospitalizations and ER utilizations.

Near real-time access to EHR and demographics data enabling the Plan to engage the members for optimal health outcomes.

Efficiency in PA adjudication timelines and in PA adjudications.

Features & Benefits

CENTRALIZED HUB FOR RECEIVING PRIOR AUTHORIZATION REQUESTS

Save time and resources required to process prior authorizations by centralizing requests in a single, cloud-based platform.

CLINICAL DECISION SUPPORT ENGINE

Uses artificial intelligence and appropriate Payer medical policies to provide instant recommendations on PA requests received.

CUSTOMIZABLE AUTO-ADJUDICATION

Enables instant, automated PA approvals for specific Payer-selected code/plan combinations, eliminating the need for human intervention and reducing turnaround time.
