

One platform for all post-acute care settings

Netsmart myUnity EHR

What if you had...

One integrated, patient-centered care record where you could see a person's complete health story across all care settings?

One connection to exchange data inside and outside your organization so you could achieve true care coordination?

One system to access all patient admissions, schedules, referrals and billing charges?

Now you can with Netsmart myUnity®—one unified, cloud-based platform that is changing the game for post-acute care providers.

Key benefits

Better clinician experience

- Streamlined clinical documentation
- Intuitive workflows that reflect the way nurses work
- Easy-to-train and easy-to-use software
- Customized role-based views
- Anytime, anywhere chart access, no matter the device
- Efficient and integrated orders management
- Smart communication tools to enhance care coordination

Better efficiencies and outcomes

- Stronger referral relationships via automated admission process
- Improved care transitions via one access point that connects you to more than half a million providers
- Increased care coordination through integration with third-party solutions
- Improved revenue cycle management with seamless business and clinical information flow

myUnity EHR supports the full post-acute continuum:

Home care

Hospice

Private duty home care

Life plan communities (CCRC)

Assisted and independent living

Skilled nursing

Memory care

Adult day care

Pediatric home care

“I love how easy myUnity is to use...I can now do an admission faster than I’ve ever done before.”

- Nurse, Four Seasons Hospice

Key features

Interoperability

- Become electronic referral partners to Health Information Exchanges (HIE), Accountable Care Organizations (ACOs), health systems and local hospitals and providers
- Interface with Allscripts, Cerner, Epic and other acute health system EHRs
- Access more than 1,000,000 connections to healthcare organizations

Actionable analytics

- Track clinical, financial, operational and referral trends to improve outcomes
- Get real-time data via a key performance indicator (KPI) dashboard
- Demonstrate results from data to prove value to payers and referral partners
