Corporate Fact Sheet

Today's organizations face many challenges due to increased competition, the fast pace of innovation, and stricter compliance requirements. In order to gain and sustain a competitive business advantage, organizations need to digitally transform themselves into process-centric organizations. Designing and automating workflows can be difficult due to unfriendly legacy systems, information silos, and imperfect internal communication.

ProcessMaker is low-code BPM and workflow software. ProcessMaker makes it easy for business analysts to collaborate with IT to automate complex business processes connecting people and existing company systems. Headquartered in Durham, North Carolina in the United States, ProcessMaker has a partner network spread across 35 countries on five continents. Hundreds of commercial customers, including many Fortune 100 companies, rely on ProcessMaker to digitally transform their core business processes enabling faster decision making, improved compliance, and better performance.
