

WHAT PEOPLE SAY ABOUT

REZOLVE.ai

The Rezolve.ai chatbot implementation was the most seamless and rapid experience of any software that I've ever deployed. No technology resources were required, yet we gained a transparent view of all functions, along with demos, trainings, and detailed answers to our questions.

Carol Murashige

SVP – MIS Research Operations

MOODY'S
ANALYTICS

I am constantly impressed with the level of support your team has provided so far. You are guys are amazing.....

Michael K. Smith

Chief Information Officer

Office of Technology Services

UE University
of Evansville

This is pretty interesting and mor interactive. I feel like I'm not talking to Bot.. this is exactly what I want all our users to feel. I really love Rezolve!

Anna Espiritu
Head of Service Desk

Rezolve's chatbot driven employee support is very versatile - and understand our IT issues. Employees do not have to see or know about a ticketing system anymore - they just have to chat with the bot. Live chat feature is very helpful as well to get live agents involved in solving complex issues.

Sandeep S.
CTO & CPO

The bot is very handy in reducing the workload to our support teams - I mentioned it's like a force multiplier and it really is because the call volume and help desk tickets has been greatly reduced allowing our support teams to actually work on more important problems and track trending issues.

Marcus C.

Application Support Analyst

Rezolve.ai engineering team has helped us get our chatbot up and running on a website. We generate quite a few leads every day and the conversion is very high of these leads.

Aalok S.

Product Manager

We want to deliver self-service to our employees for convenience and a consistent, excellent customer experience. Resolve operates 24 hours a day, 7 days a week, supporting onsite and remote workers. On the service side, the analytics provide insight into questions being asked by our user base to help us improve the knowledge base and decide what business processes to automate.
