## 🔍 CHALLENGES

- Upgrade to reliable CAD tools with intuitive interfaces
- The software licensing way (subscription) cost a larger proportion of the budget
- In need of timely and professional technical support

## 🔧 SOLUTION

ZWCAD and ZW3D

## ✅ RESULTS

- Stable CAD solutions with friendly UI make it easy, even for new users
- Permanent licenses help produce competitively priced products more flexibly
- The ZWSOFT Vietnam team provides satisfying support directly

Founded in 2009, Hyundai KEFICO Vietnam Co. Ltd. is a subsidiary of Hyundai Motor Corporation and has a prominent position in the Vietnamese auto parts industry. It is mainly engaged in manufacturing EMS (Engine Management System) components, such as sensors and actuators, and other auxiliary equipment for automobiles, etc.

For over a decade, the ever-advancing technologies and products of Hyundai KEFICO Vietnam have been winning them many awards in the automotive industry, which accentuates the importance of product design. Therefore, they started surveying better CAD software on the market to boost design quality and efficiency.

## Speed up Production from the Source

According to Mr. Hoang Trung Hieu, the production technical engineer, they need to constantly improve their equipment as well as adopt new technologies to meet customer demands for faster production and higher quality.

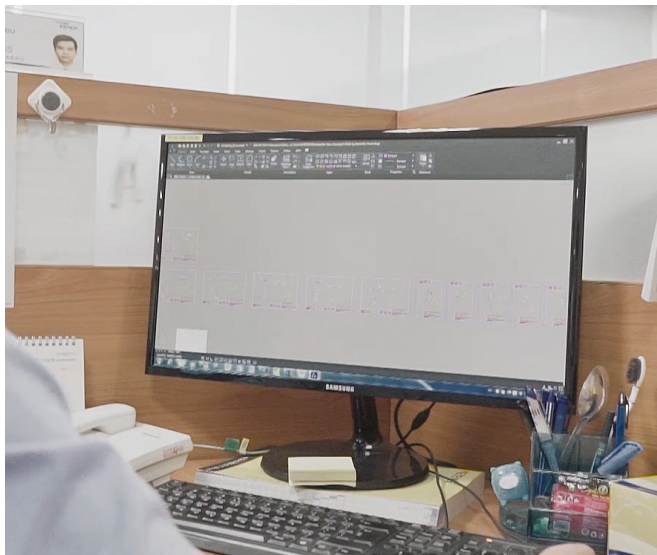

Such high expectations pose challenges, especially for the design process. On the one hand, they need powerful 2D and 3D CAD software programs with useful functions, but on the other hand, they do not wish them to be too sophisticated with cluttered interfaces. “Our concerns also include the friendliness of the software and the support of the software supplier,” explained Mr. Hoang.

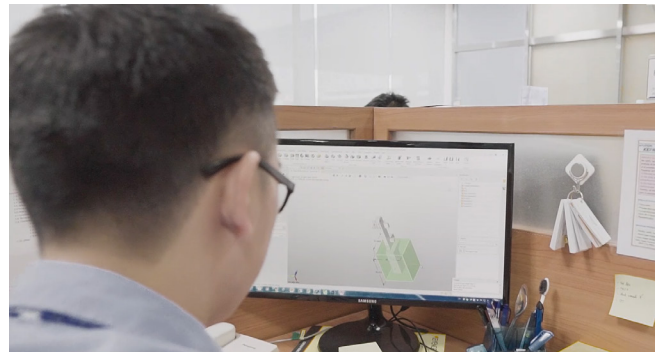

## No Training, Annual Payment, or Wait for Support

Finding a convenient 2D and 3D CAD/CAM solution for such a big company is by no means easy because they need to take both training and licensing costs into consideration.

Luckily, they found the flagship solutions of ZWSOFT—ZW3D and ZWCAD, which perfectly meet their needs. First, their user interfaces are very intuitive and friendly so that even beginners can master the software quickly, saving the company a huge bill for training. Besides, the company can own and use the software licenses permanently, which gives them much flexibility and a head start in the fierce market competition.

In addition, whenever they have questions, the local ZWSOFT team can address them swiftly, ensuring their efficient operation. Mr. Hoang appreciated, “We really value the reliability and stability of ZW3D and ZWCAD. They help us complete almost all tasks, simple or complex, in our day-to-day work. Our requests are also perfectly handled. That’s why we choose and trust ZWSOFT solutions for our business.”

“ ZW3D and ZWCAD help us complete almost all tasks. Compared with other CAD/CAM software on the market, they give us great flexibility and advantages. ”

— Mr. Hoang Trung Hieu,  
Production Technical Engineer

## Collaborate to Become Industry Leaders

With the goal of becoming an auto parts industry leader, Hyundai KEFICO Vietnam spares no effort to advance their products with a set of complete CAD solutions that allow a smooth manufacturing process.

“We hope that ZWSOFT will keep enhancing their solutions so that more powerful support tools can help us design and produce better products for the market. Hopefully, ZWSOFT and Hyundai KEFICO will continue our long-term cooperation,” concluded Mr. Hoang.

### ZWSOFT

ZWSOFT is a reliable and innovative provider of engineering software with flagship products ZWCAD and ZW3D. With over 20 years of experience in the industry, our products and services have been proven by 900,000+ AEC and MFG customers in 90 countries and regions.
